The only clue to their disappearance is a mysterious text message reading "we were forced to do it". The team's disappearance threatens the secrecy of it's research, which could potentially put your country into a chaotic panic. Now there's only one person who can rescue the Omicron Initiative and protect its secret technology from falling into the wrong hands.

Behind the Game:

Hello, my name is James, I'm an indie developer and programmed 100% of Machines at War 3 over the last two and a half years! It was quite the undertaking and I almost gave up several times, but through bad times and good, I'm excited this real time strategy game is done! I hope you enjoy it and if so please let me know, sometimes when things are tough an email or review from a customer really helps. Game on!

"An assault helicopter above, exploding, and a little trooper in a teal jumpsuit parachuting out. Maybe a nice visual touch in another game. Here? Well, shucks to that 'copter. You've got another pair of boots on the ground and a forward position to secure."

Early game: Ma, I got this in the bag!! No sweat!

Mid-game: started to hyperventilate (-.-")

Late-game: [pulling hair out](#)

[Finish: I... I... did it?! Goku exhausted](#)

[Easily one of the best puzzles I've played in many years. Good art & soothing music. I'm hooked on this game series. 10V10. Transport Giant 'gold' was/is a great game to play. Nice features for a small game and a lot of opitons for a great transportnetwork.](#)

[This game is similar to the 2004 game Transport Giant Gold Edition.](#)

[There are a few new features who are added on. And the tool to zoom out/in has become a great tool to oversee your map! What I realy miss in this steam version: " the competitors ". When you start a random map/free to play, the game asks you how many compeditors you want to add on, but they never show to your list of competitors. With this big miss no one can make a nice strategy to overpower the map and take-over other competitors.](#)

[What the builders could think about:](#)

[- add on competitors](#)

[- real-life signs: like orange : the trains might go pass the signal but wiht a lower speed](#)

[- new bridges with the option for tonages \(it forces to the player to make a strategy\)](#)

[- separate the look of the industries between continents. The city's have a diffirent look but not the industries \(the wheat farms for example are in a American style. In real life European farms don't have those\)](#)

[Overall it is similar to the 2004 game. A few new things are added on but also the big loss of compeditors.](#)

[If you want to create your own transportroutes this might be a nice game for you.. Out of all of the non-mission pack DLC for this game, this is probably the ONLY one worth purchasing. This is only for the Valkyrie and only good up to mid-levels and only up to normal difficulty. For a buck it's alright, it can give you a slight advantage at the start of the game because it's quite powerful at that time but it quickly becomes obsolete overall and is useless after a time.](#)

[I like it, I'd recommend it but none of the other stuff, except maybe a mission pack.. Enjoying this as much as the first chapter, but again the point and click is a bit off and takes some getting used to. Half an hour in so far, and have got myself stuck \(lol\). Shall be interesting to see how much it takes to get myself unstuck and moving again.. I like the idea of a program like this, but this is poorly executed. The sounds loop with very little variation after a few seconds of playing, there's a lot of definitely-not-](#)

ASMR sounds in here (and very few conventional ASMR sounds), and there's very little ability to customize the sounds to something that resembles ASMR. This project has potential, but until it reaches that potential, this program is not worth the money.. It forces you to have a vag ina. It's just not fun. I wouldnt even recommend buying it on sale like I did. It's just boring.. I love this game. It's super cute, small, and it's lovely. My only gripe is how the trophies unlock after collecting 3 stars. It's not required, but getting three stars to only then learn that you blocked the trophy was sometimes frustrating. On occasion, it would lead to a more creative solution, but sometimes it felt boring. Overall, very cute game. Solid 9.5/10. did even get my items...

i will say i love how goofy yje game is and the textures are just amazing i hope this game continues and lives on.. Love this game, it has everything a good game needs.

. Bugged, cant play online without disconnecting every few minutes. A Terrible awful game with a terrible awful dev.. This feels like a point and click adventure. Its got good pixelated art and a good soundtrack, but it feels like a lonnnng stroll with nothing happening. It is a beautiful piece of pixelated art / landscape, but just dull and too soothing for me. I can imagine this would be an awesome game for some, go youtube it see if you like it.. Sparkle 2 is a wonderful puzzle game, very similiar to Zumas Revenge and the Luxor game's. This game has a magical feel to it, and a story to go as well. The music is pleasant to the ear, and the game is very addicting. If you like these type games you will enjoy this game for sure :)

With out to many spoilers, the store page describes the game very well, what you see and hear is what you get. This game is worth the asking price, in my personal opinion :)

I will play this game till the cows come home, inbetween other games, and at my own personal leisure.

I Love this game \u2665\u2665\u2665

Only 1 down fall, my achievement for getting all the stars in Survival did not activate and pop, must be a bug glitch :(

. It hurts me to downgrade this game. You need to drive between hills and grab coins. I like it. Its simple, fun and pleases me. The bad news is....the game simply breaks and closes after a while playing. Everytime.
